## Education

### Indian Institute of Technology (ISM), Dhanbad

Bachelor of Technology in Computer Science and Engineering

Dec 2021 – May 2025

Dhanbad, India

- **Relevant Coursework:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Software Engineering, Computer Networks

## Experience

### Reliance Industries Ltd.

Graduate Engineer Trainee (Software / Data Engineer)

Aug 2025 – Present

Mumbai, India

- **Talk-to-Genie Platform** — Built a full-stack web application (REST backend + interactive frontend) integrating Databricks Genie, with secure OAuth 2.0 authentication enabling access outside Databricks and a conversational query interface.
- **Scalable Backend Architecture** — Designed a modular retrieval service that overcame Databricks Genie's **30-table limitation** by organizing **120+ tables** across **9 logical spaces**, with a semantic routing layer that dynamically directs each request to the right space.
- **Near Real-Time Data Pipeline** — Built ADF ingestion pipelines supporting **15-minute refresh cycles** with Landing → Bronze → Silver transformations powering the platform's data layer.

## Projects

### CricKart — Full-Stack E-Commerce Platform | React, Redux, Node.js, Express, MongoDB, Stripe | [GitHub](#)

- **MERN Architecture** — Built an end-to-end e-commerce store with a **React 18 + Redux** frontend and a **Node.js/Express** REST API exposing **18+ endpoints** over a MongoDB (Mongoose) data layer with User, Product and Order models.
- **Authentication & Authorization** — Implemented **JWT** auth with HTTP-only cookies, bcrypt password hashing, role-based access control (admin/user) and an email-driven password-reset flow via Nodemailer.
- **Payments & Admin Dashboard** — Integrated **Stripe** (PaymentIntent) checkout and Cloudinary image hosting; built advanced product search/filter/pagination and an admin dashboard for product, order and inventory management with revenue analytics.

### FinNest — Online Banking Application | Java, Spring Boot, Spring Data JPA, MySQL, React | [GitHub](#)

- **Layered Spring Boot REST API** — Architected a **Spring Boot 2.7** banking backend with a clean controller–repository structure, **Spring Data JPA/Hibernate** over **MySQL**, modeling users, accounts, transactions and payments with custom native queries.
- **Secure Authentication** — Implemented **JWT** authentication with request-level interceptor middleware, BCrypt password hashing and an email-verification workflow (Spring Mail) to gate protected endpoints.
- **Transaction Engine** — Built financial operations — deposits, inter-account transfers, withdrawals and bill payments — with balance validation, failure handling and full audit logging, surfaced in a React + Redux dashboard with live balance charts.

### Tinder AI Coach | Python, FastAPI, LangChain, Google Gemini, RAG | [GitHub](#)

- **Web-Based Profile Automation** — Built a FastAPI dashboard where users manage and update their entire Tinder profile (bio, prompts and photos) from one place; the system standardizes and optimizes the inputs and writes them back to the live account, so users never open the Tinder app directly.
- **Multimodal Photo Analysis** — Integrated Google Gemini (gemini-2.5-flash) to analyze profile photos and return actionable feedback on composition, presentation, lighting, background and photo selection.
- **India Dating Knowledge Base** — Web-scraped and curated data on the Indian dating landscape (profile norms, preferences and photo best-practices) into a knowledge base that grounds the coach's profile and messaging advice in the local context.

## Technical Skills

**Languages:** Java, JavaScript, Python, SQL, C++, C

**Backend:** Spring Boot, Spring Data JPA, Hibernate, Node.js, Express.js, FastAPI, REST APIs, JWT, OAuth 2.0

**Frontend:** React, Redux, Material-UI, HTML, CSS, Styled Components

**Databases:** MySQL, MongoDB, PostgreSQL, SQLite

**Tools & Concepts:** Git, Maven, Docker, Stripe, Cloudinary, OOP, DSA, DBMS, Operating Systems, System Design

**Data & AI:** Databricks, PySpark, ADF, ETL, LangChain, RAG, LLMs, Machine Learning

## Achievements

- Secured **AIR 2903** in JEE Advanced and **AIR 4616** in JEE Mains
- Ranked among **Top 200 teams out of 18,500+ teams** in Amazon ML Challenge
- Participated in Hackfest'23 organized at IIT Dhanbad
